President’s Corner

Good Epi Month to you all. In Southern California, in fact all of California, it is HOT HOT with plenty of fires all over the state. I hope you have been taking care of your epies by keeping them watered and fertilized. Be sure to mist them occasionally during the day. This helps the stems absorb moisture. We had a great presentation at our August meeting by Don Patterson. He is a master hybridizer of epies and also has a large collection of succulents and cactus. Seeing photos of his garden and the love he has for his plants brought out plenty of envy from all of us! I want to thank Jerry Moreau who helped put the program together for Don.

By the way we had a great turnout for our meeting, thanks to all who came. I would like to encourage all of our members to attend the End of Year Bash Party. Details are in this newsletter. Also be sure to put the September 12th meeting date on your calendar, when Janice Wakefield will present on the hybridizers Fort and O’Barr.

We truly have an amazing Society. When help is needed members usually respond, but now we are in need of members to step up and be on the Board. My term as president is up so we are looking for you to step up and help support our society. The position of president is one of the less demanding positions. The most important duty is to chair the meetings. Please consider being a part of the board.

Our photography contest is coming up in November. This is a good time to go through last spring’s photos and decide which you would like to enter in the contest.

Till next time,

Tim

Meeting Programs

Pre-Meeting Workshop: Jerry will fill in for Ron this month. He will talking about fertilizers.

August Program: This month we will enjoy a presentation by Janice Wakefield (SDES Treasurer) entitled "Fort and O’Barr: The Prolific Hybridizers from the 1950s." Among their more than 1000 hybrids, they created the first consistently yellow hybrid, ‘Reward’. Janice has a great selection of images of their amazing flowers. Please come out and join us for an enjoyable evening on Wednesday, September 12 in Casa Del Prado Room 101 at 7:30 p.m.

Board Meetings To Change Day & Time

SDES is trying something new! Historically the monthly board meetings were held on the 4th Wednesday of the month. Starting in August the board meetings will be on the 2nd Wednesday of the month before the general meeting, starting at 6 p.m. in room 104. Please come and join us!

Refreshments at the General Meetings

We rely on the members to provide the refreshments at the general meetings. In order to have a good assortment of items it helps if everybody contributes at some time during the year.

Baked goods, dragon fruit, cheese & crackers, fruit, and nuts are just some of the possibilities for all of us to enjoy.

If your last name begins with the letters M—Q please bring some refreshments to the September general meeting. Anyone is welcome to bring in some goodies.

“When you take a flower in your hand and really look at it, it's your world for the moment. I want to give that world to someone else. Most people in the city rush around so, they have no time to look at a flower. I want them to see it whether they want to or not.” Georgia O'Keeffe
Summer is in full swing but nothing keeps our dedicated volunteers from helping out with the epi collection and display! We have been busy working with the plants despite the heat. We continue to repot and pot-up epies, weed and feed, and keep everything looking good. We will be planting some *Hylocereus undatus* in the display. We have been collecting *Tillandsia* and other *Bromeliad* species to add to the display. We want to add more, both to give the area a more authentic tropical feel and to educate the public about companion plants. To that end, I obtained a variety of *Tillandsia*, including some less common species. They are small in size right now, so Sandra and Heather attached them to a Eucalyptus branch. This keeps them together and makes it easier to keep an eye on them. As they grow larger, we will move them to the collection. Unfortunately some of the epi plants in the display are struggling. We will do some repotting in the next few work parties to help them along. As I have said before, this is a grand experiment and it will take a good coordinated effort between us and the park horticulture staff in order to succeed.

Thank you to all who helped out this past month, you are the best! Sandra Chapin, Ron & Velma Crain, Cindy Decker, Beth Jackson, Heather Jackson, Betsy & Jerry Markle, Tim Paule, Paul van der Poleg, Janice Wakefield, and Gretchen Ward.

The next work party will be September 15th & 29th.

Support your passion, support the Society’s collection at the San Diego Zoo Safari Park. Currently we have the world’s largest public display of epiphyllum hybrids and epiphytic species on display. We are currently creating a very unique new display and to keep this going SDES needs money to make it happen. All money raised goes into the care of the collection and display. We are all volunteers who create and maintain the display because we are passionate about it. All donations are always welcome and greatly appreciated. Consider putting SDES & the epi collection/display in your will or trust.

Details of How To Become A Volunteer at the Safari Park can be found on our website. Click on [SanDiegoEpi.com](http://SanDiegoEpi.com)
End of Summer Epi Bash
Saturday, October 6th
It’s always a fun time!

It's that time of year! Most of our epies have stopped blooming, so now we only have photos and memories. Let's get together to share those springtime memories. Our end of summer bash is a great opportunity for new and long time members to get together and renew (or make new) epi friendships. All members are encouraged to join the festivities.

This year Paul and Terryll will be our hosts. We will enjoy their recently renovated backyard for food, fun, and fellowship. The party starts at 4:00p.m. The society provides the main course and beverages. This year the food theme will be October Fest foods. Members are asked to share an appetizer or dessert.

Everyone is encouraged to come. It doesn't matter if you are new to the society or a long time member—everyone is welcome! A highlight and tradition of the party is announcing the Rookie of the Year award. Paul and Terryll ask that you bring a chair if at all possible.

The address of the party is: 1295 Sagewood Dr. Oceanside, CA 92056-6456.
Looking forward to good fun, fellowship, and food! Hope to see you all there.
It Is Election Time

“Many hands make for light work” John Heywood

The society has been doing well and is fortunate to have so many people volunteer to make it successful. However to make this happen and to continue to be a successful society takes effort. Please consider volunteering for a position — the more people involved the less any one person has to do. If interested or have questions you can speak with any board member or contact the chair of the nomination committee Cindy Decker at (619) 972-9664 or cdecker4007@gmail.com. Elections take place at the November General Meeting.

The current slate of officers is:

<table>

SDES is an all volunteer organization — without you we would not exist! All we get from the Society starts from what we put into the Society. Below are just a few examples of what the society needs right now.

**Positions needing to be filled:**

**Publicity Coordinator**
The Publicity Coordinator shall ensure an announcement of the annual Mother’s Day Show will be mailed in a timely manner to the San Diego Union-Tribune and other local media. The Publicity Coordinator shall assist the Mother’s Day Show Chairman in publicity as requested by the Chairman (i.e. posters, photographs, social media, and flyers).

**San Diego Botanical Garden Foundation Representative**
This individual will represent the San Diego Epiphyllum Society at the semi-monthly San Diego Botanical Garden Foundation meetings and to report all pertinent SDBGF meeting minutes and developments to the SDES Board. The SDBGF is an umbrella organization overseeing the use of the Casa del Prado building for all of their various member organizations, including SDES. The SDBGF acts as a middle organization between SDES and the City of San Diego which grants all permits at the Casa del Prado. The SDBGF Representative will be responsible for all the reservations of all facilities at the Casa del Prado building in Balboa Park that are required for SDES events hosted there. This includes monthly General Meetings, workshops, Board Meetings, and Mother’s Day Shows and Sales. This permitting process takes up to two years to complete. Each winter, reservation requests will be submitted two years in advance. The SDBGF Representative will input all reservation requests into SDBGF’s online scheduling system. The SDBGF Representative will obtain and distribute annual facilities reservation permits from the City of San Diego through the SDBGF and will make sure copies of these permits are on hand at all SDES events at the Casa del Prado.

Volunteers continued

Safari Park Epi Volunteer
Work with the epi collection and display at the San Diego Zoo Safari Park. Details of How To Become A Volunteer at the Safari Park can be found on our website. Click on SanDiegoEpi.com

Volunteer at sales—Check with Cindy Decker for her needs at upcoming sales.

Volunteer growing cuttings/plants for the society sales—Check with Cindy Decker for her needs at upcoming sales

Volunteer at meetings or events—this could be anything from bringing in food, setting up, cleaning up, welcoming in new folks, or a friendly smile.

Offer your garden for an event such as epi photo caravan or end of season epi bash.

If you are interested contact President Tim Paule timpaule@cox.net (619)-443-0826 or talk to him at a meeting.

2019 Mother’s Day Sale
I know it’s early to be thinking about next year’s Mother’s Day sale. Now is the time we need to think about the plants we are going to sell. The plants we sell should be from all of us in the society. With your help we can have many new and nice plants for next year. If several members grow cuttings in 4” or larger pots then we will have a good amount and variety of plants for next year to sell.

If you say "I can't grow because I don’t have any pots", let me know and I will get you some. If you have any questions, let me know.

Cindy Decker cdecker4007@gmail.com or call at 619-972-9664

This month’s subject is *Rhipsalis neves-armondii*.1 *R. neves-armondii* is a member of the *Calamorhipsalis* subgenus.2 This subgenus includes species such as *R. puniceodiscus* and *R. hoelleri*.3

*R. neves-armondii*4 has two forms, forma *neves-armondii* and forma *megalantha*. Forma *megalantha* was found on an island5 to the southwest of the city of Rio de Janeiro, by Dr. Alberto Loeffgren. At first this was thought to be a new species, *R. megalantha*, and Britton & Rose refer to it as such. However it was later determined to be a form of *R. neves-armondii*. This form differs from f. *neves-armondii* by thicker branches (up to 0.5 inch across) and larger flowers (about 1.5 inches).6

*R. neves-armondii* f. *neves-armondii* occurs in the Brazilian states of Paraná, Rio de Janeiro, Santa Catarina, and São Paulo. It grows in the Atlantic forest at elevations less than 3300 feet,7 on trees (epiphytic) and on rocks (epilithic). It has white flowers (about 3/4 inch across) and large red berries (about 3/8 inch). The green branches are cylindrical, ranging from about 1/8 inch to 3/8 inch in diameter. In brighter light, the branches will take on a red tinge. Britton & Rose mention that the branches are “arranged in whorls”. The plant starts with erect growth but as it gets older, the growth begins to hang down.

In cultivation this plant prefers brighter light.8 Like many other epiphytic cacti, do not overwater this plant or allow it to dry out. It prefers a well-draining substrate. If the weather becomes hot and dry, mist the plant; remember, it comes from a humid environment.9

If you are patient and give this plant the proper conditions, it will reward you with masses of flowers, and lovely red fruit to follow.

Have a good month and enjoy your garden!

---

**Notes:**

*1 Yup. Another *Rhipsalis.*
*2 A subgenus is a grouping of similar species within a genus. Currently the *Rhipsalis* genus has three or five subgenera, depending upon whom you consult.
*3 The distinguishing character of this subgenus (*Calamorhipsalis*) is the bottom of the flower (the pericarpel) is sunken into the areole (place on the stem where the spines come out). Because of this characteristic, Curt Backeberg referred to this species as *Lepismium neves-armondii*.
*4 *R. neves-armondii* was named in 1890 by Dr. Karl Schumann of the Berlin Botanisches Museum. He named this species after Dr. Amaro Ferreira das Neves Armond, who was at that time the director of the Brazilian National Museum. *R. neves-armondii* was first found near the city of Rio de Janeiro.
*5 Ihla de São Sebastio, Ilhabela, São Paulo, Brazil. As far as I can find out, it's never been found anywhere else in the wild.
*6 I have a very very small plant with thicker segments marked “*Rhipsalis megalantha*”. However, as it has not yet flowered, I'm not sure of the identity..
*7 1000 meters.
*8 Under shade cloth or partially shaded, not direct sun.
*9 Like many other epiphytic cacti.
GYFF Continued

**Installation & Holiday Banquet**

**Wednesday December 12, 2018 at 6:30 p.m.**

Start off this year's Holiday Season at SDES’s Installation Banquet! Please join us for an evening of fun & fellowship. This year we'll return to The Butcher Shop Restaurant in Kearny Mesa.

EpiCon was such a huge success this year that the executive board voted to increase the members' discount price for dinner. This year the price for members will be $20.00. Non-members will pay the full price, $60.00.

Dinner choices are either Filet Mignon, Mahi Mahi, or Vegetarian. Your dinner comes with salad, main course, dessert, wine, and coffee or tea.

You can purchase your tickets at the September, October, or November meetings from Mildred Mikas — cash, checks, and all credit cards accepted. Or you can pay on-line at [www.SanDiegoEpi.com](http://www.SanDiegoEpi.com) or you can make a check payable to “SDES Dinner” and send check with your dinner choices to:

Gerry & Mildred Mikas 3502 Avenida Amorosa, Escondido CA 92029

Any Questions? Call Mildred @ 760-690-1124 or email mvmikas@cox.net.
HILARY HEINTZ

By Pat Stebbins

One of our talented out-of-state members is Hilary Ann Heintz of North Canton, Ohio. Hilary has been growing Epis for eight years and she has kindly sent us a glimpse of her joys and trials of growing epiphyllums in a cold climate.

"This is Hilary Heintz reporting live from Ohio.

Cacti have been a part of my life since I was twelve years old, but it wasn't until I was 32 that I bought my first Epiphyllum. It was E. oxypetalum and I found it quite by accident on a trip through Pennsylvania. That was eight years ago and since then many more have been added to my collection.

My Epis number only about 20 now, my problem being space. They grow so fast that before I know it they're monsters. So I've whittled my collection down to a manageable size of plants with just the flowers I like. Some are ‘Padre’, ‘King Midas’, ‘Pete's Snowflake’, ‘Ber-Tee’ and ‘Mystic Mood’.

The weather in Ohio can make growing sun-loving plants a problem. They have something here called lake-effect. This refers to the effect Lake Erie has on our weather. Water from the lake evaporates and is blown over Ohio by the winds of Canada. This causes a lot of cloudiness in the summer and almost constant grey weather in the winter. I must say that this past summer was exceptional with few rainy days. Needless to say if I had a choice, I’d grow my plants in a sunnier place, but I’m here so let’s make the best of it!

After some experimentation I've found a potting mix that works – for my Epis as well as all my other succulents.

It's called Metro Mix 500. It also comes in other mixes like 220, 300 and 350 but they are not recommended for long term growing. Metro Mix is a product of Grace, Inc. the Terra Lite and Peters Plant Food people. The 500 mix contains sphagnum peat moss, vermiculite, granite sand, processed bark, composted pine bark and a nutrient charge. To this I add bone meal and this seems to please all my succulents and terrestrial cacti just fine. I also use this mix for my Cymbidium Orchids. But for my Epis who like a more constantly moist mix I add fine grade Orchid Bark. This added bark increases drainage and at the same time keeps the entire mix more evenly moist.

I grow all my plants in my tiny seven by nine foot greenhouse which is attached to the south side of our breezeway along the garage wall. The east wall of the greenhouse is actually the west wall of the garage. Out house and garage are brick so this wall was always too damp for any of my cacti, even my Epis and
Selenicereus. So I tried a few orchids and they loved it! Besides Cymbidiums I have a few Cattleyas, Dendrobiums, Anguloas and a Lycaste. Who says you can’t grow cacti and orchids in the same house?

At this time of year most of the plants are dormant, including the Epis. So starting in November and continuing through January the Epis are sprayed but not watered. In February, when the flower buds begin to appear, I start my feeding schedule.

I use Peters’ 10-30-20 at one half strength for the first three feedings and Fish Emulsion (also half strength) for the fourth. Plants are fed every time they are watered until they’ve finished blooming. By mid-April I move the Epis and Orchids to the patio where I put up my temporary lathhouse. They can’t summer in the greenhouse because the temperature goes over 100° and you know what the Epis think of that.

I drape plastic sheeting over the lathhouse to protect the plants at night until the end of May.

The plants are sprayed every day during the summer in the morning and also midday if necessary. They are watered but not fertilized for one month after flowing is finished. After this month I resume my feeding schedule, until in mid-August the plants are brought back into the greenhouse. By the end of September feeding is ended and the plants receive only plain water through October. My growing routine may seem odd to those of you who live in Southern California but is seems to work here.”

As you can see, Hilary has wisely limited her collection to what she considers a manageable amount. Can you imagine moving 100 or 300 plants from one place to another twice a year.

Thank you Hilary, for letting us share.
We have a good climate here for outdoor growing all year round. It does get very hot in summer, over 40°C (104°F), so a second covering of shade cloth is required for 2 or 3 months which is then removed before winter. It gets cold and wet during the winter months, never to freezing point or even near that, so established plants that are big and root bound handle it ok. Smaller newer epis sometimes need to be moved under an eave or similar out of the rain. At present we are at the end half of winter and I don’t have too many casualties that I can see. Blooming season is just around the corner! I first came across these plants about 30 years ago when a lady I was working with gave me cuttings of ‘German Empress’ and ‘Ackermanii’ with blooms attached.

They seemed so unusual and I had no idea what to do with them. I planted both in a 14 inch basket in potting mix. Somehow they managed to grow!

As with most new epi fans I then wanted to collect every one available. These days I am much more selective of course and have hybridized and registered a few nice ones. We have always had an Epiphyllum and Hoya society here, but in the last few years it has really taken off and we now have a membership of 50 or more. As the other societies have folded we are now the only one in Australia. I must say it has become a bit Hoya-centric lately but I have decided to grow almost exclusively Epis. There are so many magnificent new hybrids from this side of the globe, notably the Brunton’s ‘Kiwi’ ones and Tony Hanson’s ‘Ulana’ hybrids. I have no idea how many plants I have but I have 3 large shade houses crammed full, so it is a fair few!

My passion for these plants has not waned much over the years. They certainly are addictive so if you are a beginner...be warned!

Editors note:
Perth’s latitude is: 31° 56’ 0” S
San Diego’s latitude is: 32° 42’ 55” N

Steve's hybrids include: 'Black Pearl', 'Class Clown', 'Dr. Earnshaw', 'Fijian Joy', 'Karen Michelle', 'Lady Bold', 'Pink Elegance', ‘Tasstic'

Now is the Time

✓ **Maintain good grooming** by eliminating unsightly and non-productive branches. This directs the plant's energy into the healthier branches which will produce stronger blooms next spring.

✓ **Protect plants from excessive direct sunlight.** Although the end of summer is in sight, in Southern California we can still anticipate some very hot days.

✓ **Prevent soil from drying out.** However, keep an eye on the humidity. Even though it may be very hot, too much watering during humid weather can contribute to root rot. Make sure there is air circulation around your pots.

✓ **Protect new growth from wind damage.** Hot, dry Santa Ana winds blow in September. Keep an eye on your plants during these days.

✓ **Protect apples (seed pods) from birds and rodents.**

✓ **Give plants final feeding of a balanced fertilizer for the fall growing season.**

✓ **Mist or hose down branches to clean off dirt and pollutants.**

✓ **Some die-back is natural** in epies and fall is a season you'll see this along with some new growth.

✓ **Many species plants bud and bloom now.** Remember to give them some fertilizer and don't move plants that are budding.

✓ **Watch for pests.** Late summer and early fall is an active time for snails. During dry weather, snails and slugs are drawn to moist, potted plants.

**People’s Choice Winners since 1995**

In 1995 George & Jerry Plaisted initiated the People’s Choice Table. They have been taking care of it ever since. Here are the top three winners voted on by the visiting public to our Mother’s Day Show. You will note that in 2004, and this was the only year, there were ties for second and third place. As you peruse through the list you will notice some that are winners often. Cultivars ‘Elinor Victoria Latimer’ and ‘Venetian Affair’ people really like.

Keep In Touch

Members are the most important part of our society. The epies are what bind us. Together we create more beauty for all to enjoy. As in any group, we are more potent together. Lifelong friendships are made in the society. Knowledge, plants, and passions are shared between members. Mostly, fun is had by all. We have members all over the world.

We want to keep in touch with you. If you know of a member who can no longer attend meetings and/or events, we can send a cheery card to let them know they are missed. If there is a member who is having a milestone birthday we can send happy birthday wishes. If there is a member who is ill or a member who has passed away, we can send a get well or sympathy card. Why? Because we care about each other.

Keep in touch with us. Let us know what is going on in your garden. Have questions? Ask us. Have growing tips? Share with us. Want to see something in the newsletter? Tell us.

This year is packed with many wonderful activities like EpiCon XVI, annual sales in Balboa Park and the Safari Park, and the Mother’s Day Show. There is also our ongoing work with the epi collection at the San Diego Zoo Safari Park, where we work to preserve epicacti cultivars and epiphytic cacti species and educate the public about these plants. Come join us for an hour, a day, a month, or all year! Your support means everything.

Want to write an article, have an idea for a program, or just want to join the fun? Please let us know how you want to get involved. We want to hear from you. We could not exist without you. We are greater because of you.

Corresponding Secretary Terryll Rogan at (760) 518-6363 or terryllr@aol.com
Membership Secretary Beth Jackson at (858) 692-0314 or bethjackso@yahoo.com
Newsletter Editors Jerry Moreau at (619) 208-7654 or jerrysdca@cox.net and Linda Sinkovic at linda@cruzware.com

Message from Membership Secretary
Beth Jackson

If you are having issues with receiving the electronic newsletter or know someone who is, please make sure to mark membership@sandiegoepi.com as an accepted email address. Also check your spam, junk, trash, and/or clutter folders as some email servers will send large emails directly to those folders.

Reminder:
Annual Epi Photography Show/Contest at the November Meeting.

Start taking pictures of your epies now so you will have lots of pictures to choose from to enter into the contest.

Off-Season Blooms

This month we will start again to list what has been blooming in member’s gardens. This list is a bit of informal research of off-season epi blooms. Here you can track which epis have been blooming consistently off-season over the years. If you would like to add to the research and list what epies have been blooming in your yard, email the editors with your list of off-season blooms and species. There are two list because the hybrids are off-season bloomers and the species bloom different times of the year anyway.

Blooming Off-Season

**Sandra Chapin** (Rancho Bernardo): ‘Ernst Gündchen’, ‘Educator’

**Cindy Decker** (Spring Valley): ‘Good N’ Plenty’

**Jerry Moreau** (San Diego): ‘Daniel’

**Pentico Collection** (Arcadia): ‘Connie Mayer’

**Safari Park** (San Pasqual Valley): ‘Connie Mayer’

**Linda Sinkovic** (Santa Cruz): ‘Elvira Paetz’

Blooming Species

**Heny Brandenburg** (San Diego): *Epiphyllum pumilum*

**Don Burnett** (South Coast LA): *Disocactus macranthus*, *E. anguliger*, *E. hookeri* ssp. *guatamalense* monstrous AKA curly locks

**Robert Kuettle** (Los Angeles): *E. pumilum*

**Linda Sinkovic** (Santa Cruz): *E. oxypetalum*, *Lepismium cruciforme*, *L. warmingianum*

---

Want/Wish List

If you have epies on your wish list that you are looking for it is possible someone in the Society has it and is willing to share a cutting or two with you. As a service and benefit to members this list is being included in the newsletter. Send your wish list along with contact information to the editors to get it added here.

**Terence Brashear** birdnird@yahoo.com
‘Hedge Hog’

**Sandra Chapin** sandraleewc@gmail.com

**Doug Gates** douggates@gmail.com
*Epiphyllum laui, E. phyllanthus, E. baueri*

Clay Pots from the Safari Park Epi Display for Sale

At the Safari Park, we are in the process of phasing out the old clay pots we have been using in the Display House for many years. As you can see from the photo, these clay pots come in two styles. Many of them were sourced locally, from Tecate, Baja California Norte, Mexico. They look as though they may have been recovered from the ruins of Pompeii, and you may imagine they once graced the gardens of the villa of Pliny the Elder. They have been carefully cleaned with a stiff brush to remove the grime of millennia while at the same time, preserving their rich patina.

There are currently approximately 80 of these clay pots available for sale at $5.00 each. All proceeds will benefit the continued maintenance of the SDES’s epiphyllum collection at the Safari Park. If you are interested in them contact—Jerry at: jerrysdca@cox.net or Ron at: hikerron@cox.net Put CLAY POTS in the subject line.

‘Evanston’
Photo by Roger Chapin

The above photo was sent from a happy customer who bought 15 clay pots for her yard.
Resources

As a benefit to members here is a list of resources for members. This list will continue to grow. If you know of any resources you would like to have included, contact the editors.
